# RESORBA® COLLAGENS

FOR COMMON ORAL SURGERY

**RESORBA® is a German manufacturer and leader in the development of high-end collagens for surgical and dental wound care, as well as surgical sutures for all medical disciplines.**

The generic term COMMON ORAL SURGERY describes multiple procedures that support general practitioners in their daily routine, including SOCKET PRESERVATION, an adequate TREATMENT OF PERIODONTAL INFECTIONS, MANAGEMENT OF DENTAL TRAUMAS, etc. In each case an optimal treatment is mandatory in order to reduce delayed complications above all for the patient but also for the surgeon in view of further procedures.

## **RESORBA® SPONGES & CONES**

### **WITH Antibiotics**

- PARASORB® Fleece Genta HD
- PARASORB® Cone Genta

### **WITHOUT Antibiotics**

- PARASORB® Fleece
- PARASORB® Fleece HD
- PARASORB® Cone

## WHY COLLAGEN?

### **Collagen is completely absorbable.**

This means that there is no need for a second operation such as is required with non-resorbable materials. The naturally-structured collagen fibrils activate clotting like endogenous collagen.

## WHY GENTAMICIN?

### **Gentamicin sulphate is an aminoglycoside and has a broad spectrum of antibacterial activity.**

For certain antibiotics (e.g. aminoglycosides), the highest possible serum concentration determines the extent of the bactericidal action and the duration of the postantibiotic effects.

### **PRODUCT CHARACTERISTICS**

#### **Collagen Sponges & Cones**

- Able to absorb large amounts of fluids on account of their sponge-like structure
- Fast integration into the surrounding tissue
- Rapid and safe haemostasis
- Stabilisation of the blood clot
- Easy to cut and to adapt

FOR COMMON ORAL SURGERY

## SPONGES

### ABSORBABLE WOUND COVERAGES

and inlay as a defect filler

#### PARASORB® Fleece Genta HD

- Highly concentrated collagen for larger bone defects
- 1 collagen gentamicin sponge of 2.5 x 2.5 x 0.5 cm contains 35 mg native equine collagen fibrils
- 25 mg gentamicin sulphate, equivalent to 13.82 – 17.88 mg gentamicin

#### PARASORB® Fleece

- 1 cm<sup>2</sup> contains 2.8 mg native equine collagen fibrils

#### PARASORB® Fleece HD

- Highly concentrated collagen for larger bone defects
- 1 cm<sup>2</sup> contains 5.6 mg native equine collagen fibrils

## CONES

### ABSORBABLE CONES

for treatment after tooth extractions

#### PARASORB® Cone Genta

- 1 collagen-gentamicin cone contains 22.4 mg native equine collagen fibrils
- 16 mg gentamicin sulphate, equivalent to 8.80 – 11.44 mg gentamicin

#### PARASORB® Cone

- 1 collagen cone contains 22.4 mg native equine collagen fibrils

## INDICATIONS AND PRODUCT RECOMMENDATIONS

### **COLLAGENS WITH ANTIBIOTIC PROTECTION**

#### **PARASORB® Cone Genta**

#### **PARASORB® Fleece Genta HD**

- Treatment of an extraction socket without bony defect but obvious signs of infection
- Prevention in case of „risk patients“ (diabetics, multimorbid or immunocompromised patients, etc.)
- Treatment of defective area after debridement
- Apicoectomies
- Cystectomies
- Dental Hemisections
- Root amputations
- Removal of impacted teeth in the molar area

### **COLLAGENS WITHOUT ANTIBIOTIC PROTECTION**

#### **PARASORB® Cone**

- Treatment of an extraction socket without bony defect and without any signs of infection
- Haemostatic agent after tooth extractions and other oral surgeries

#### **PARASORB® Fleece**

#### **PARASORB® Fleece HD**

- Common Oral Mucosa Surgery
- Haemostatic agent after tooth extractions or other oral surgeries
- Wound coverage after soft tissue grafting

### **PLEASE NOTE**

„FLEECE“-Shaped collagens are rather suggested to be used in irregular defects / „CONE“-Shaped in regular round defect morphologies.

PARASORB® Cone is a high-density collagen product.

FLEECE HD is recommended if longer absorption time is required.
